

# Wave Crest Caravan & Camping Park

## Environmental Policy

We at Wave Crest Caravan, Camping and Motor Home Four Star Park, awarded Best Coastal Park 2009, are committed to providing a good quality service whilst reducing the environmental impact of our business on the environment.

Our Park is located mid-way on the world famous Ring of Kerry Route so we are totally aware of the environment around us and we manage our business accordingly.

As part of this commitment we are participating in the Green Tourism Business Scheme which provides accreditation and encouragement for tourism businesses to reduce their environmental impact. We are at present awaiting grading.

At Wave Crest we encourage customers to consider their environmental impact by informing them of the following:

- Use the special bins provided for glass bottles, cans, plastic and paper, and kitchen waste.
- Leave hazardous waste such as used batteries and empty gas canisters in special bin provided for safe disposal.
- Never leave taps running – our Showers are on a timer so there is no waste of water
- Support the local food producers whose produce is available in our park shop and inform them of the local Market every Friday 10.00-12.00 noon during the summer months.
- If you are staying on the Park and have your four-legged friend or friends with you, please ensure that your dog is kept on a lead and clear up any messes they might leave lying around.

At Wave Crest where possible we:

- Supply environmentally friendly washing products and cleaning materials in our shop.
- We use environmentally friendly washing and cleaning products in our cleaning routine.
- Low energy bulbs are used where possible.
- Send used laser/ toner cartridges to Jack and Jill Foundation
- Supply totally degradable bags for kitchen waste and for recyclable material which can be disposed of at our Community Waste and Recyclable Point nearby.
- Support for ethical, fair trade practices.

We provide information on The Kerry Way Walks and Cycle Routes in the area, things to do and see and pubs and restaurants to visit. We also sell Ordnance Survey Maps of the area which you might find useful.

We welcome support, participation and suggestions from you our customers as to how we can improve our environmental policy and protect the environment and increase the enjoyment of your stay.
